Objective

As a skilled back-end/full-stack web developer with experience in the software development life cycle, I am actively seeking for a full-time position as a back-end or full-stack developer. I am confident that my technical expertise and passion for innovation will enable me to make significant contributions to your organization and drive continued success.

Skills

- **Tech Stack:**
  LAMP stack (linux, apache, mysql, php)
  Laravel framework,
  Design patterns, data structure & algorithms,
  SQL databases (mysql, postgrsql, sql server),
  JavaScript, Jquery, HTML5, CSS3, Boostrap, tailwind, material ui.
- **Development and Operations :**
  Git, GitHub, Agile Methodologies, Jira, CI/CD, Clean code architecture

- **Personal Skills :**
  Excellent communication and interpersonal skills,
  Leadership skills & Handling Team members,
  Ability to work independently and as part of a team,
  Adaptability to new technologies and learning.

Experience

- **Dielegende**   10/2024 - Present
  Junior Full Stack Web Developer
  - As a Full Stack Developer, I specialize in Laravel (backend) and Angular (frontend), with a primary focus on building and optimizing dashboards and developing RESTful APIs for web and mobile applications.
  - Developing and maintaining admin dashboards using Laravel as the backend and Angular for the frontend.
  - Building scalable RESTful APIs for mobile and web applications.
  - Managing database architecture and optimization with MySQL.
  - Ensuring secure authentication & authorization using JWT, Sanctum, and OAuth.
  - Handling server-side logic, data processing, and performance optimization.
  - Collaborating with frontend developers to ensure seamless UI/UX integration.
  - Implementing best security practices for web and mobile applications.

- **ITI Information Technology Institute, (MCIT) Ministry of Communications and Information Technology,**
  Full Stack Web Developer | ITI Internship   05/2024 - 10/2024
  - **Description :** Completed an intensive full stack web development internship at ITI, gaining comprehensive experience in both backend and frontend technologies through hands on projects.
  - **Backend Development :** Built and optimized server side functions with PHP and Laravel, implementing scalable APIs and CRUD operations to support various applications.
  - **Frontend Development :** Developed responsive, interactive interfaces using HTML5, CSS3, JavaScript, TypeScript, and Angular, ensuring high standards in user experience and mobile responsiveness.
  - **Project Highlight :** Contributed to Eventoria, an event management system with multi role functionalities. Created an admin control panel with real time data features and map integrations for event route visualization.
  - **Version Control & Collaboration :** Used Git and GitHub for efficient team collaboration, following Agile methodologies to manage workflows and address project needs.
  - **Additional Technologies :** Worked with Docker for containerization, developed RESTful APIs with Axios and JSON server, and gained familiarity with Linux basics (RedHat and Ubuntu) .
  - This internship strengthened both technical and problem solving skills, preparing for impactful

contributions in full stack development roles.
